
A
200 cm chord through the 2.2 m box
y (m)
x (m)
teleport
B
unit 413, grid score 0.78
1D firing is this slice
C
4 trials; dotted = teleport reset
position on track (cm)
time (s)
D
A (cued) 35 | C (blind) 30 | A 35
ground truth, not a classifier
decode error (cm)
no cue
trial
E
1 trial × position rate map
trial
position (cm)
F
2 trial × trial corr.
trial
G
3 gate vs the null
mean r with other trials
cell's own null 0.06
trial
H
4 labels
trial
truth
no filt
filt
I
2-means cannot report 0 or 1; the gate can
no gate
gate
reported fraction
true anchored fraction
J
which is why that session cannot test the gate
per-trial accuracy
the A→C→A session sits here
no gate
gate
true anchored fraction
K
a size-5 filter erases runs < 3
recall on that epoch
filter floor
3 trials
non-anchored epoch length (trials)
