
A
landmarks
(the task frame)
gated
engagement
gate
OPEN → anchored
SHUT → non-anchored
self-motion
(speed, head direction)
always on
theta–speed slope 0.374 → 0.218
entorhinal position estimate
a continuous attractor
grid
cells
FS
interneurons
action
(where the animal
slows and stops)
simulated
B
theta-nested gamma
42°
95°
theta
slow γ
fast γ
ANCHORED
NON-ANCHORED
